Teenagers 'spend an average of 31 hours online'

Addicted to Facebook? App tells you how often you check social media and **FREEZES** your phone to force you to take a break

- QualityTime works in the background to monitor phone and app usage
- It tracks the times a screen is unlocked and which apps are used the most
- Free Android app also shows how much time is spent on individual apps
- Alerts can sound if usage exceeds a certain amount of time
- And users can choose to 'Take a Break', at which point the app will lock the screen and prevent them using the phone for a set amount of time

If you sleep with your phone under your pillow, or check Facebook before doing anything else in the morning, you may have an unhealthy 'digital diet.'

A team of Californian developers has created an app that helps people track how much they use their phones, and specific apps - and weans themselves off, if necessary.

Called QualityTime, it works in the background to monitor how many times a screen is unlocked, how long someone spends playing certain games, or which apps they open the most.

How do your child's habits compare to this?

Reporting online

The online reporting facility has been developed so that you can report hate crimes online, if you do not want to report directly to the police. The police take hate crime very seriously and will record and investigate this offence even if you do not want to give your details. However, you must note that the investigation and ability to prosecute the offender(s) is severely limited if the police cannot contact you.

You may also specify how you want to be contacted and if contacting you would cause you any difficulties. The police will not pass on your details without your consent and would ask you to consider giving your details confidentially.

To report a hate crime - please select the county/area where the crime happened from the drop down list below and you will be taken to the correct reporting form. You can use the postcode search at www.police.uk to check the name of your local area.

Internet Hate Crime

Your police force:

The police don't tolerate hate crime
